Manufacturing with a passion for style

www.xyloncorp.com

OUR STORY

18 years ago, Plena Group broadened its building materials industry segment with the purchase of a sawmill near Sarajevo, Bosnia and Herzegovina. With large investments and continuous development of the facilities the operation was able to expand significantly. Plena rebranded and named the company XYLON, the Greek word for “wood”. Deepening ties with clients, in 2014 Plena Group established Futura Floors GmbH to expand its product range, facilitate communication and logistics.

With a stunning portfolio of Solid Parquet, Engineered flooring, Decking and Designer Vinyl, both Xylon and Futura promote exceptional indoor and outdoor floor coverings specially chosen for our clients. With a capacity of over 500,000 m² per year and warehousing of over 20,000 m², the factory has supplied leading clients throughout Europe and Middle East. We believe in long term partnerships and welcome new business.

Solid wood floor

There is no other flooring that reflects the natural properties of a real wood floor as perfectly as the solid planks and parquet manufactured in our factory. This traditional type of plank has been used for interior floors for centuries because of its timeless beauty. The floor is suitable for use in domestic living spaces as well as for larger areas.

We have a wealth of experience in finishes for almost every type of wood. You can choose between brushing, oiling and lacquering to show off the natural beauty of the wood. Since we have our own factory, we can also create stairs and skirting for you that also match your floor.
